## More Than A Welder

- **Non-Destructive Testing**
- **Ultrasonic (UT)**
- **Magnetic Particle (MT)**
- **Liquid Penetrate (PT)**
- **Visual (VT)**
- **Certified Weld Inspection**

All welders at Moran Iron Works (**MIW**) have gone through rigorous testing prior to becoming part of our team, the most common certification requirements are SMAW 3G and 4G weld types. Whether our employees receive their certifications via outside sources or through our Iron One Foundation program, the highest skill levels are required to meet nationally recognized welding code certifications and standards. This assures our clients, that MIW will meet and exceed the American Welding Society's fundamental qualifications.

Each of our welders commits themselves to lifelong learning with continued education and by obtaining advanced welding certifications. With a cultivated progressive crew at the helm we have taken on industrial fabrications with specialty alloys, fabricated and elongated commercial marine vessels, seized the opportunity to fabricate state-of-the-art modified industrial Bag-house systems, and this is just the beginning. With our solid foundation of MIW welders, each new success is a testament to their knowledge and ongoing education in the workplace.

### MIW North

As we approach the third month of operation for MIW North, the shop floors are filled with materials, generating a needed work space for some of our smaller projects. In the past we elected to subcontract out some fabrication pieces due to spacing and man hours, now with the purchase of the 25,000 square foot facility in Cheboygan, MI and the addition of six new skilled employees we have been able to utilize our own resources and help contribute to the local economy. With the development of MIW North, Moran Iron Works can provide more in-house fabrication to our customers, giving them the peace of mind that all materials are meeting the same high standard of quality that they have come to expect from Moran Iron Works.

## International Testing & Inspection, LLC

Moran Iron Works (MIW) utilizes our affiliated company, International Testing and Inspection, LLC (ITI) to offer customers non-destructive testing capabilities.

The Inspectors are certified in accordance with ASNT, SNT-TC-1A specifications as well as certified through the American Welding Society. Whether in house or at a customer's facility, our Inspectors are certified to utilize modern testing tools such as ultrasonic inspection equipment for use during certified UT testing procedures. With their extensive background in industrial fabrication, ITI testing proves the adequacy of procedures and of performance from our Moran Iron Works welders. With each of MIW's industrial fabrications, ITI is always on-site testing and critiquing our quality and performance, proving to the customer and documenting that the job is successful as expected and required, to ensure the highest level of quality workmanship.

### Employee Corner– Ben Sharpe

Moran Iron Works welcomes Ben Sharpe in his new position as Purchasing Administrator. You may have spoken with Ben in the past in his Sub-Contracting Liaison role, but after seeing the dedication and reliability Ben exhibits, he was hand-picked to fill the position of Purchasing Administrator. His detail oriented characteristics has generated a smooth transition into his additional position.

Ben obtained a BS in Industrial Engineering from Grand Valley State University. With three children active in sports he spends his free time either coaching or as a spectator. When he gets time to himself he enjoys getting in a round or two of golf.
